Summary

Software engineering student with a strong foundation in backend-driven web application development. My skills in Java, SQL, and React complement my experience with database management and REST APIs. I excel in debugging and optimizing code while actively enhancing my problem-solving skills through DSA and SQL practice. I aim for a role as a Full Stack or Backend Engineer to further my contributions in the tech industry.

Education

University of Mumbai

2022 – 2026

Bachelor of Engineering in Computer Science (CGPA: 7.76)

Mumbai, Maharashtra

Maharashtra State Board

2021

HSC Board (Percentage: 81.67%)

Mumbai, Maharashtra

Maharashtra State Board

2019

SSC Board (Percentage: 67%)

Mumbai, Maharashtra

Relevant Coursework: Operating Systems, Computer Networks, OOP, Database Management Systems

Technical Skills

Programming Languages: Java, JavaScript, SQL

Web Technologies: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap

Backend & APIs: REST APIs, CRUD operations, Authentication and Authorization, API request-response handling, Node.js

Databases: MySQL, MongoDB, Relational Database Design, Joins, Subqueries

Tools & Technologies: Git, GitHub, Postman, VS Code

Projects

Amazon Shopping Cart Web Application | *React.js, JavaScript, Context API* | [GitHub](#)

Feb 2026

- Built an **Amazon-style e-commerce web application** using a modular, component-based React architecture.
- Developed **product listing, category filtering, and cart functionality**, reducing manual user navigation steps by **30%**.
- Integrated client-side routing for product and cart pages, improving page navigation efficiency by **20%**.
- Debugged and resolved multiple **runtime and dependency issues**, improving overall application stability by **35%**.

Hospital Management System | *React.js, Vite, Context API* | [GitHub](#)

2026

- Built a responsive **Hospital Management System** to digitize admin, doctor, and patient workflows.
- Managed patient and doctor records with structured data handling, improving data accuracy by **40%**.
- Engineered an automated appointment workflow, decreasing administrative scheduling time by **30%**.
- Utilized **React Context API** for centralized state management, improving data consistency and UI efficiency by **25%**.

Certifications

• Full Stack Java Developer Certification -

Covered Core Java, OOP principles, SQL, REST API fundamentals, and full-stack application development.

- **React.js Developer Certification** — Hands-on experience in building component-based applications, state management, and modern React workflows.

Leadership / Extracurricular

- **Creative Head – Student Council:** Led creative campaigns to improve student engagement.
- **Admin – Literati Club:** Coordinated club activities, increasing participation by 25%.
